

SYSTÈME DERMATOLOGIQUE

from MARIA GALLAND PARIS

A highly efficient care system that leads to perfect skin, step by step.

This new range is based on the principle of “helping the skin to help itself”, the skin being activated from within with a lasting effect. The clear-cut product assortment centres on various exfoliators, masks and serums which are coordinated according to a building-block concept and supplement one another in their effectiveness.

The central ingredient of the new series is called **Formule β -GHFx**: a scientific name for an exceptionally efficient complex that has been exclusively developed for MARIA GALLAND PARIS. The composition of this “magic formula” remains the secret of the MARIA GALLAND researchers. It is a complex, dermo-active solution of ingredients, whose concentration responds precisely to the requirements of the skin when it comes to renewal and rejuvenation. Formule β -GHFx gives the skin the impulse to become active itself once more.

SYSTÈME DERMATOLOGIQUE is proven to increase the cell renewal process. Wrinkles and crow’s feet are visibly diminished and impurities distinctly reduced.

SYSTÈME DERMATOLOGIQUE is the tailor-made care for people who desire results they can instantly see and feel and who want to preserve their beauty and the youthfulness of their skin for as long as possible.

In spite of their exceptional efficiency, the products and ingredients are also outstandingly well tolerated by people with sensitive skin. To avoid giving the skin “too much” care, no more than **15 selected active ingredients** are contained in each product. Parabens, paraffins and colourings have been completely omitted from the range, fragrances to a large extent.

SYSTÈME DERMATOLOGIQUE can

- **increase the skin’s renewal rate**
- **keep skin ageing in check**
- **refine the skin’s structure**
- **firm the skin tissue**
- **strengthen sensitive skin**
- **normalise blemished skin**
- **soothe irritated skin**

The skin’s functions are activated with a long-lasting effect, regeneration of its upper layers is stimulated, and oxidative stress is broken down. SYSTÈME DERMATOLOGIQUE is also the ideal care before or after surgical lifting.

SYSTÈME DERMATOLOGIQUE THE BUILDING-BLOCK SYSTEM

Whether it's care at home or treatment in the salon, the transparent building-block system – made up of care components D1 to D7 – enables products and ingredients to be specifically selected and ensures optimal care results. The individual building blocks can be put together in line with the skin's condition and requirements to create a perfect "house of beauty".

The beginning of the dermatological care programme is similar to a patient discussing their medical history with a doctor: a skin-analysis form is completed in conjunction with the beauty therapist, the data specified forming the basis for creating an individual treatment plan.

With this treatment plan as a foundation, the beauty therapist draws up a tailor-made care recommendation from the product building blocks offered by SYSTÈME DERMATOLOGIQUE: a combination of salon treatments and daily care, as the success of the care at home can, of course, be considerably increased by regular treatment in the salon.

The system comprises:

D1 Cleansing

D2 Exfoliation – a choice of 2 products (+ 1 exfoliator for salon use only)

D3 Moisture

D4 Masks – a choice of 2 products (+ 1 mask for salon use only)

D5 Serums – a choice of 4 products

D6 Eye care

D7 Care creams – a choice of 2 products

SYSTÈME DERMATOLOGIQUE is intended for use as continual care for preserving the youthfulness and beauty of the skin.

Important: During the treatment period with SYSTÈME DERMATOLOGIQUE, no other products should be used and the treatment plan should be strictly adhered to. The MARIA GALLAND beauty therapist in the salon accompanies the treatment with good tips and regular analyses of the skin's condition.

SYSTÈME DERMATOLOGIQUE D1 – D7

D1 CLEANSING

D1 DOUBLE EFFECT FACE AND EYE CLEANSER

A mild cleanser and make-up remover for the face, eyes and lips
200 ml, 30.00 euros

D2 EXFOLIATION

D2-1 GENTLE PEELING

An enzymatic exfoliator for fine skin, sensitive skin and skin susceptible to couperose
50 ml, 40.00 euros

D2-2 MEDIUM-STRENGTH PEELING

An exfoliator, containing enzymes and fruit acids, for normal skin
50 ml, 40.00 euros

D2-3 INTENSE PEELING (for salon treatment only)

An exfoliator, containing enzymes, fruit acids and glycolic acid, for blemished, non-sensitive skin
200 ml

D3 MOISTURE

D3 MOISTURISING GEL

A moisturising fluid for cooling and soothing the skin; supplies intensive moisture
100 ml, 34.00 euros

D4 MASKS

D4-1 GREY MASK

A cleansing mask, containing microsilver, with an alkaline pH value
75-ml tube, 42.00 euros

D4-2 WHITE MASK

A harmonising mask with an alkaline pH value ("mini" modelling)
100-ml tube, 42.00 euros

D4-3 COLLAGEN POWDER

A collagen mask to assist cell renewal (for salon treatment only)

D5 SERUMS

D5-1 MICROSILVER SERUM

A serum, containing microsilver, for impurities
30-ml airless, 59.00 euros

D5-2 SCHISANDRA SERUM

A soothing serum containing schisandra fruit extract
30-ml airless, 59.00 euros

D5-3 PEPTIDE SERUM

An anti-ageing serum for wrinkles and to guard against skin ageing
30-ml airless, 59.00 euros

D5-4 ALPHA-ARBUTIN SERUM

A serum for lightening pigmentation marks
12-ml glass flacon with pipette, 39.00 euros

D6 EYE CARE

D6 EYE GEL-CREAM

Anti-ageing care for the area around the eyes
15-ml airless, 50.00 euros

D7 CARE CREAMS

D7-1 LIGHT FACIAL CREAM

A light day and night cream to conclude treatment
50-ml jar, 69.00 euros

D7-2 RICH FACIAL CREAM

A rich day and night cream to conclude treatment
50-ml jar, 69.00 euros

D1 CLEANSING

D1 DOUBLE EFFECT FACE AND EYE CLEANSER

Mild cleansing with D1 DOUBLE EFFECT FACE AND EYE CLEANSER is the first basic building block. The product cleanses thoroughly and gently; its pH value corresponds to that of tear fluid.

Ingredients include: L-arginine, panthenol
200 ml, 30.00 euros

D2 EXFOLIATION

The most important step in the systematic care programme

D2-1 GENTLE PEELING

An enzymatic exfoliator with a mild pH value, especially suitable for sensitive skin, fine skin and skin that is susceptible to couperose. The enzymes remove the dead corneous cells of the epidermis especially gently, thereby activating cell regeneration. The product has a mild pH value between 5.5 and 6.5.

Ingredients include: An enzyme complex of botanical and biotechnological origin
50 ml, 40.00 euros

D2-2 MEDIUM-STRENGTH PEELING

An exfoliator, based on enzymes and fruit acids, for normal skin. This highly active product removes dead flakes of skin, promotes the synthesis of collagen and provides moisture. It stimulates the skin's cell renewal ability to an optimum – and offers excellent tolerability. MEDIUM-STRENGTH PEELING makes the skin look smoother, firmer and more youthful. An acid pH value between 3.8 and 4.8 enables the enzymes and fruit acids to take optimal effect.

Ingredients include: A fruit enzyme complex from pineapple, papaya and fig
50 ml, 40.00 euros

D2-3 INTENSE PEELING (salon treatment only)

Due to its intensive effect, this exfoliator is used during treatment in the salon only. In addition to enzymes and fruit acids, it also contains glycolic acid, a substance which is obtained, amongst other things, from sugar cane and which has a particularly small molecular size. This allows the glycolic acid to penetrate especially deep into the skin, loosen and remove corneous skin, improve the cell renewal rate, stimulate the formation of new elastin and collagen, increase moisture levels and make the skin look instantly fuller and more elastic. Especially suitable for non-sensitive skin with a large number of wrinkles, blemished skin and very rough skin.

Ingredients include: Glycolic acid (a fruit acid obtained, amongst other things, from sugar cane)

D3 MOISTURE

D3 MOISTURISING GEL

This mild care gel supplies the skin with intensive moisture and is an important step for cooling and soothing the skin activated by the exfoliation.

Ingredients include: FORMULE β -GHF_x, malachite (gives the gel its blue colour), allantoin

100 ml, 34.00 euros

D4 MASKS

The masks are important for absorbing the residue of the substances removed by the exfoliator from the skin and for soothing the complexion. Both masks can also be used if exfoliation has not taken place beforehand.

D4-1 GREY MASK

Ideal both for blemished and sensitive skin. The product cleanses and has an antibacterial and soothing effect. Its alkaline pH value (7.2-8.2) counterbalances the acid value of the skin brought about by the exfoliator.

Ingredients include: FORMULE β -GHF_x, microsilver, vitamin E, kaolin

75-ml tube, 42.00 euros

D4-2 WHITE MASK

Harmonises and soothes the skin. The mask counterbalances the acid pH value of the skin after use of the exfoliator. Suitable for skins of all conditions.

Ingredients include: FORMULE β -GHF_x, dipotassium glycyrrhizate, mineral clay, kaolin

100-ml tube, 42.00 euros

D4-3 COLLAGEN POWDER (salon treatment only)

For treatment in the salon only! The collagen mask supports the skin's cell renewal mechanisms, has a visible anti-wrinkle effect and provides moisture. As the mask is extremely cooling, it closes the pores. This means that the ingredients channelled into the skin can take their full effect. This treatment can be combined with a massage which is carried out – very unusually – on top of the collagen mask.

Ingredients include: Collagen, alginate, kieselguhr

D5 SERUMS

The four serums are a further important building block in the system. They are used to treat various, specific, skin problems and can be combined as required. The preceding exfoliation makes them exceptionally effective.

D5-1 MICROSILVER SERUM

Strengthens sensitive skin and counteracts impurities. The microsilver, obtained from silver, has an antibacterial effect and prevents irritation. Suitable both for blemished and sensitive skin.

Ingredients include: FORMULE β -GHF_x, microsilver, schisandra fruit extract
30-ml airless, 59.00 euros

D5-2 SCHISANDRA SERUM

Especially suitable for irritated and reddened skin. The serum has an intensive soothing effect and is therefore ideal for harmonising the skin after exfoliation.

Ingredients include: FORMULE β -GHF_x, schisandra fruit extract, allantoin, inca inchi oil
30-ml airless, 59.00 euros

D5-3 PEPTIDE SERUM

A serum, with a concentrated anti-ageing effect, which is especially suitable for skin that has already aged, and to prevent wrinkles. The exceptional effectiveness of the light gel cream is guaranteed by the preceding exfoliation. The tripeptide/tetrapeptide complex contained in the serum smooths wrinkles and improves the skin's structure, firmness and functions. It also promotes communication between the individual skin layers.

Ingredients include: FORMULE β -GHF_x, a tripeptide/tetrapeptide complex, argan oil
30-ml airless, 59.00 euros

D5-4 ALPHA-ARBUTIN SERUM

A serum for lightening pigmentation marks, which is applied topically with a pipette. It works best if it is dabbed on regularly twice a day and patted in lightly. Alpha-arbutin blocks the melanin biosynthesis by inhibiting enzymatic oxidation.

Ingredients include: FORMULE β -GHF_x, alpha-arbutin, allantoin
12-ml glass flacon with pipette, 39.00 euros

D6 EYE CARE

D6 EYE GEL-CREAM

Light and well-tolerated eye care that boosts elasticity, counteracts the formation of wrinkles and reduces those which already exist. Moisturisers make the skin around the eyes fuller and give it a more youthful appearance. The product has a soothing effect on the skin in this area which tends to be susceptible to irritation. Ophthalmologically tested.

Ingredients include: FORMULE β -GHF_x, peptides, L-arginine, sodium PCA, a lipid/sterol complex

15-ml airless, 50.00 euros

D7 CARE CREAMS

The creams always conclude treatment – whether in the salon or at home. As the final building block in the programme, they provide the skin with perfect care during the day and at night.

D7-1 LIGHT FACIAL CREAM

A day and night cream with a light, quickly absorbed texture which is ideal for the summer or in warm climates. It gives the skin exactly what it needs to complement and complete the previous care steps. The product is also especially suitable for oily skin types.

Ingredients include: FORMULE β -GHF_x, inca inchi oil, schisandra fruit extract

50-ml jar, 69.00 euros

D7-2 RICH FACIAL CREAM

A day and night cream with a rich texture that makes for a special feeling of well-being. Despite its richness, the cream is not heavy on the skin. The tripeptides contained in the product are remarkable: they are peptides that have the effect of a polypeptide which also occurs in the venom of the temple viper and acts in a similar way to Botox. The polypeptides gently reduce the contractions of the muscles and are therefore able to smooth expression lines or prevent them from forming.

Ingredients include: FORMULE β -GHF_x, tripeptides, inca inchi oil, apricot seed oil, vitamin E, panthenol

50-ml jar, 69.00 euros
